

AXIS Q9307-LV Dome Camera

All-in-one audio-visual monitoring device

This all-in-one device combines sharp video, audio, actionable analytics, and LED indicators. With four built-in microphones and a built-in speaker, it supports two-way communication. It comes with coughing fit and stressed voice analytics adding an extra audible dimension to active incident management. AXIS Live Privacy Shield lets you remotely monitor activities while safeguarding privacy. And the LED indicators clearly show when the camera is recording or when audio is being used. This vandal-resistant, IK08-rated camera withstands daily wipe-downs with chemical detergents. Plus, with just one device to install, it offers cost-efficient one-drop installation.

- > 5 MP video with two-way audio
- > Preinstalled audio and video analytics
- > Remote monitoring while safeguarding privacy
- > Withstands chemical wipe-downs
- > Cost-efficient all-in-one device

General	
Casing	IP44- and IK08-rated Polycarbonate hard-coated dome Aluminum and plastic casing Color: white NCS S 1002-B

	Withstands chemical wipe-downs. Read more in the user manual.
LED indicators	LED indicator Audio LED
Mounting	Mounting bracket with junction box holes (double-gang, single-gang, and 4" octagon) and for wall or ceiling mount
Power	Power over Ethernet (PoE) IEEE 802.3af/802.3at Type 2 Class 4 Typical 10 W, max 25.5 W
Connectors	Network: RJ45 10BASE-T/100BASE-TX PoE I/O: 4-pin 2.5 mm (0.098 in) terminal block for 1 supervised digital input and 1 digital output (12 V DC output, max. load 25 mA)
IR illumination	OptimizedIR with power-efficient, long-life 850 nm IR LEDs Range of reach 40 m (130 ft) or more depending on the scene
Storage	Support for microSD/microSDHC/microSDXC card Support for SD card encryption (AES-XTS-Plain64 256bit) Recording to network-attached storage (NAS) For SD card and NAS recommendations see axis.com
Operating conditions	Temperature: 0 °C to 40 °C (32 °F to 104 °F) Humidity: 10–85% RH (non-condensing)
Storage conditions	Temperature: -40 °C to 65 °C (-40 °F to 149 °F) Humidity: 5–95% RH (non-condensing)
Dimensions	For the overall product dimensions, see the dimension drawing in this datasheet.
Weight	1250 g (2.8 lb)
Box content	Camera, installation guide, TORX® TR20 bits, terminal block connector, connector guard, cable gaskets, owner authentication key
Optional accessories	AXIS T91E61 Wall Mount, AXIS T91B47 Pole Mount, AXIS T94K01D Pendant Kit AXIS T8415 Wireless Installation Tool AXIS Surveillance Cards For more accessories, go to axis.com/products/axis-q9307-lv#accessories
System tools	AXIS Site Designer, AXIS Device Manager, product selector, accessory selector, lens calculator Available at axis.com
Languages	English, German, French, Spanish, Italian, Russian, Simplified Chinese, Japanese, Korean, Portuguese, Polish, Traditional Chinese, Dutch, Czech, Swedish, Finnish, Turkish, Thai, Vietnamese
Warranty	5-year warranty, see axis.com/warranty
Part numbers	Available at axis.com/products/axis-q9307-lv#part-numbers
Sustainability	
Substance control	PVC free RoHS in accordance with EU RoHS Directive 2011/65/EU/ and EN 63000:2018 REACH in accordance with (EC) No 1907/2006. For SCIP UUID, see echa.europa.eu
Materials	Renewable carbon-based plastic content: 31% Screened for conflict minerals in accordance with OECD guidelines To read more about sustainability at Axis, go to axis.com/about-axis/sustainability
Environmental responsibility	axis.com/environmental-responsibility Axis Communications is a signatory of the UN Global Compact, read more at unglobalcompact.org

a. We recommend a maximum of 3 unique video streams per camera or channel, for optimized user experience, network bandwidth, and storage utilization. A unique video stream can be served to many video clients in the network using multicast or unicast transport method via built-in stream reuse functionality.
b. Feature available with ACAP
c. This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit. (openssl.org), and cryptographic software written by Eric Young (eay@cryptsoft.com).

Key features and technologies

AXIS Live Privacy Shield

Remotely monitor activities both indoors and outdoors while safeguarding privacy in real-time.

With Al-based dynamic masking you can choose what to mask or blur while addressing rules and regulations protecting privacy and personal data. The application enables masking of moving and still objects such as humans, license plates, or backgrounds. The application works in real-time and on both live and recorded video streams.

AXIS Object Analytics

AXIS Object Analytics is a preinstalled, multifeatured video analytics that detects and classifies humans, vehicles, and types of vehicles. Thanks to Al-based algorithms and behavioral conditions, it analyzes the scene and their spatial behavior within – all tailored to your specific needs. Scalable and edge-based, it requires minimum effort to set up and supports various scenarios running simultaneously.

Chemical resistant casing

In some environments where hygiene requirements are rigorous, cleaning the exterior of the surveillance camera could be required daily or even several times a day. The recommended cleaning procedure involves chemical wipedowns using a soft cloth with specific chemical solutions such as cleansers or disinfectants. The chemical resistance of the casing has been verified through two types of in-house testing: environmental stress crack resistance testing and cleaning simulations.

Coughing fit and stressed voice detection

Coughing fit and stressed voice detection are two audio analytic applications that detect incidents by listening to the surrounding audio 24/7. The audio analytics consists of two separate detection algorithms, and you can choose to use one of them, or both. The cough detector detects single coughs or coughing fits. The stressed voice detector identifies sound patterns associated with duress, anger, or fear.

Echo cancellation

Devices with echo cancellation can recognize sounds that the built-in loudspeaker produces as echoes and remove them.

LED indicators

LED indicators are used to signal different functionalities to the close environment. The LEDs help to improve safety, security, and operational efficiency and at the same time safeguards privacy. A LED indicator can for instance help protect privacy by letting you know when the camera is recording or when audio is being used. The LEDs can be used separately or together and can be switched off for more discrete monitoring.
